

Smoothing the way between borders

Crown takes care of you, your spouse, your children and all the intricate details.

Personal attention by our female Immigration Consultants

Did you know that Crown Relocations UAE handles female immigration inquiries separately to male immigrants? We'll accompany your spouse and children when they attend immigration services and assist with their applications for the UAE.

Staying inside the law when you're outside the country

Crown's immigration consultants track changes to international immigration laws and keep an eye on your changes of status. Changes in employment status, employment contract extensions, marital status, births or other family developments are an integral part of compliance management.

With on-the-ground knowledge, Crown will help you understand immigration rules, guiding you and your family through what can be a confusing process. This will help you settle into your new home in the UAE.

We'll take on all the complex tasks: processing entry visas; helping with documentation for work and residence permits, including apostilles, legalizations and translations and completing and submitting immigration forms. Our expert UAE team manages the local bureaucratic requirements to accelerate and simplify the process. We are here for you.
